

Description

A hand crafted Australian made Alnico magnet electric guitar loudspeaker made to replicate vintage 60's guitar models. Where possible both materials and processes used in the 60's has been employed to regain the vintage sound.

The 30W cone is produced in house under our control from a blend of natural renewable Eucalypt and Hemp fibres; this fibre formulation delivers the classic Australian tone. This Australian tonal voice, musicians choice, is based upon prior art and research developed and refined over 30 years of in-house paper cone manufacturing experience.

This model employs a copper voice-coil wound onto Kraft paper bobbin to emulate the sixties sound, this prior art produces a nominal 30Watt-power rating. The voice-coil is adhered to the cone body with a selected adhesive to ensure reliable performance but retain the sixties voicing characteristics.

The voice-coil, cone materials, and magnet properties have been selected to emulate the high efficiency, bright top typical of guitar loudspeakers manufactured in the 60's, this model only requires moderate amplifier power for delivery. The magnet assembly has been FE optimized and the machined components are zinc plated for corrosion resistance.

This Australian hand crafted model is an excellent choice for serious musicians where high efficiency, classic alnico tone, 60's signature and high reliability are desired.

Application

Best match with guitar amplification up to 30W. This model experiences cone breakup at a moderate 15W thereby delivering vintage tone with crunch and overdriven character at rated power typical of guitar speakers made in the 60's.

Options

Model	Impedance
AA304U30-MI-8	8 ohm
AA304U30-MI-16	16 ohm

This datasheet applies to our AA304U30-MI-8 model.

Technical Data

Typical measured Thiele/Small parameters

Maximum program power		= 30 watt
Thermal power rating		= 30 watt rms
Rated nominal impedance	Z	= 8 ohms
Rated frequency range		= 50 - 6000 Hz
Piston sensitivity level		= 98.7 dB SPL
Max SPL @ 1w		= 110 dB SPL
Resonance frequency		= 80 Hz
Mechanical Q	Qm	= 17
Electrical Q	Qe	= 0.55
Total spk. Q	Qts	= 0.53
Diaphragm mass	Mmd	= 21.5 gms
Effective diaphragm diameter	D	= 25.3 cm
Effective diaphragm area	Sd	= 0.050 sq.m.
Vol. equiv to spk compliance	Vas	= 51 litres
Mechanical compliance	Cms	= 0.139 mm/N
BL product	Bl	= 12.7 T.m
Voicecoil diameter	d	= 45 mm
Voicecoil material		= Copper
Voicecoil DC resistance	Re	= 6.3 ohms
Voicecoil inductance @ 1kHz	Lvc	= 0.97 mH
Voicecoil height		= 10.0 mm
Height of air-gap	Hg	= 8 mm
Peak linear displacement	Xpk	= 1.0 mm
Reference efficiency		= 4.6
Speaker total mass		= 3.07 Kg

Specifications subject to change without notice.

Mounting Details

Baffle opening diameter
 front mounting 273 mm
 rear mounting 273 mm
 Mounting pattern:
 eight 6 x 9 mm slots equi-spaced on 291 mm PCD.
 Flange thickness 9 mm

Frequency Response

Infinite baffle sound pressure response recorded at 2.83V at one meter.
 Blue curve - on axis spl response
 Green curve - 30 degrees off axis response

Impedance plot

Free-air impedance magnitude plot.
